

EXCLUSION NOTICE FOR VACCINE-PREVENTABLE DISEASE

Dear Parent,

When an outbreak of a vaccine-preventable disease occurs in our school, the Southwest Utah Public Health Department has the authority (R396-100-8) to exclude from school any student that is not immunized against the disease.

We have had an outbreak of _____ at _____. The Health Department has determined that it will be necessary to exclude the following student: _____ from today through the date of _____. There are two reasons why this is necessary:

1. To reduce your child’s risk of exposure to the disease by those who are infectious.
2. To reduce the risk of exposure for other students and staff.

If you desire to change this exemption status please contact your health care provider or the Southwest Utah Public Health Department. Vaccination would eliminate any future exclusion.

SOUTHWEST PUBLIC HEALTH DEPARTMENT HEALTH DEPARTMENT
