## Student Memorial Policy

*Health/Safety/Welfare Washington County School District*

### 1. Purpose:

From time to time the Washington County School District must confront the issue of dealing appropriately with the death of a student. The purpose of this Policy is to set forth uniform guidelines when responding to the death of a student. When a student dies it is generally a school wide (if not a community wide) tragedy. Schools are immediately identified as having some responsibility to make sure the student's life is recognized and honored. The District welcomes this opportunity and desires to help in the grieving and healing processes. The District is obligated, however, to exercise caution in the method used to recognize the deceased student and his/her family. Research indicates two potential problems.

First, physical memorials have the potential to communicate immortalization, essentially glamorizing the death in the minds of some students. Young people who suffer from depression or other psychological problems and are at risk for suicidal behavior are often motivated to take their own lives when they are exposed to a memorial immortalizing the death of a student.

Secondly, memorials can be an ongoing visual reminder of what happened, leading to students worrying if it will happen again or wondering if they could be next. From this perspective, memorials in the school or on school property pose a significant risk simply because a school is a "closed" environment. It becomes almost impossible for students to avoid the physical reminders of a death when a memorial is located on school premises. Memorials need to be an opportunity of choice, as we all grieve differently. For some, it is healthier not to be reminded.[\[1\]](#)
